TraffiX Business Model Canvas

ADAPTIVE, EXPLAINABLE TRAFFIC SIGNALS · A SOFTWARE SUBSCRIPTION FOR PUBLIC BUYERS

TRAFFIX

8 KEY PARTNERS

- **Signal installers & integrators**
  hardware, installation, public tenders
- **Camera & controller vendors**
  we run on their existing equipment
- **Telecom operators**
  connectivity between junctions and the cloud
- **Donors & funders**
  Startup Act, Smart Capital, donor mobility programmes
- **ESPRIT**
  R&D, talent, events, credibility
- **Transtu, civil protection**
  bus and ambulance priority data

7 KEY ACTIVITIES

- **Multi-agent software R&D**
  junction agents, masters, safety rules
- **City calibration** & per-city model retraining
- **Integration** with controllers and cameras
- **Digital-twin traffic studies** (SUMO)
- **Sales, tenders**, support and training

6 KEY RESOURCES

- **Multi-agent platform** + hard-coded safety engine
- **Trained models** (XGBoost, LightGBM) & decision log
- **Digital twin** of central Tunis
- **Team of 6 engineers** (→ 15 by year 5)
- **Pilot results** as a public reference

2 VALUE PROPOSITION

Adaptive, safe, explainable signals at about ⅓ of competitors' 10-year cost, with evidence before purchase.

- **Adapts every second**
  less car waiting than actuated control in 12 of 12 scenarios
- **Safe by construction**
  ≤ 0.7 conflicting greens/h vs 900–3,600; rules no AI can override
- **Emergency & bus priority**
  emergency trips 28% faster
- **Explained decisions**
  100% logged, answered in AR / FR / EN
- **Software on existing hardware**
  ≈ 36k TND per junction over 10 yrs vs 90–165k

4 CUSTOMER RELATIONSHIPS

- **Free twin study → paid pilot → multi-year contract**
- **Monthly performance reports** (Synapse)
- **On-site support** & operator training
- **Persona apps** for operators, drivers, buses, ambulances

3 CHANNELS

- **Direct sales** to cities and ministries
- **Public tenders** with integrator partners
- **Live demos** on the city's own junctions
- **Donor programmes** for Maghreb / Africa
- **Events, ESPRIT**, free citizen apps

1 CUSTOMER SEGMENTS

WHO PAYS

- **Municipalities**
  Greater Tunis, Sousse, Sfax
- **Ministries**
  transport, interior

WHO USES

- Traffic operators, police

WHO BENEFITS

- Pedestrians, drivers, ambulances, Transtu buses

LATER

- Maghreb & francophone African cities (years 4–5)

9 COST STRUCTURE

≈ 60%	1.5k TND	≈ 750 TND	0 TND
Team, 6 → 15 people 72k → 630k TND / yr	Fieldwork per new junction	Hosting per junction-year on a standard CPU	Licences: open-source stack. Plus marketing, tenders, admin

5 REVENUE STREAMS

60k TND	6k TND	3k TND/yr	≈ 25k TND
Pilot corridor, ≈ 7 junctions, 6 months	Setup per junction, one-off	Subscription per junction, ≈ 75% margin	Digital-twin traffic study

Target: 200 junctions in 5 years (≈ 10% of Tunisia) · ≈ 1.3 MD revenue in year 5 · profitable from year 3, cumulative +238k TND by year 5
